## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Group I, claims 1-12 in the reply filed on August 02, 2005 is acknowledged.

### *Specification*

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

SEMICONDUCTOR DEVICE HAVING PLURALITY OF LAYERS THAT HAVE  
DIFFERENT THICKNESSES FORMED ON A CARRIER SUBSTRATE.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 are rejected under 35 U.S.C. 102(B) as being anticipated by Nakano (JP. Patent No. 10-340928).

Art Unit: 2814

Nakano teaches a semiconductor device as claimed including:

a carrier substrate (1) having a plurality of lands (2) that have different thicknesses from each other; and

a semiconductor chip (4) mounted to the carrier substrate (1). (See Fig. 2c).

With respect to claim 2, the thickness of each of the lands (2) gradually varies from the inner region to the outer region of the carrier substrate (1).

*Allowable Subject Matter*

6. Claims 3-12 are allowed.

7. The following is an examiner's statement of reasons for allowance: prior art of record fails to teaches a semiconductor device in the combination of the limitations as claimed including:

a) a first semiconductor package having a plurality of first lands that have different thicknesses from each other; and second semiconductor packages, each having a plurality of second lands that have different thicknesses from each other, the second lands being arranged opposite the first lands.

b) a first and a second carrier substrates having a plurality of first and second lands, respectively, that have different thicknesses from each other; and the second lands being arranged opposite the first lands.

Art Unit: 2814

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
